

Local Capital Projects

Local Government Division

Targeted capital facilities funding for local governments and community nonprofits.

Each capital project funded under this program stimulates our state and local economies by providing construction-related employment and associated revenues.

Program Overview

The Local Capital Projects Program is responsible for administering specific capital construction appropriations that benefit local governments and nonprofit organizations throughout Washington State.

Key Initiatives

The current capital budget includes over \$44 million in new funding for 70 special projects. Each appropriation, which is sponsored by the Governor or the Legislature, contains language and provisions that tailor it to the needs of the recipient organization. Examples of projects funded recently include:

- Mirabeau Point Community Complex (Spokane);
- Burke Museum (Seattle);
- Clark County Skills Center (Vancouver);
- Chewelah Peak Environmental Learning Center (Chewelah);
- Eatonville City Projects (Eatonville);
- Friends of the Falls/Great Gorge Park (Spokane);
- South Wenatchee Family Services Center (Wenatchee);
- Cancer Research Facility Grant (Seattle); and
- Seattle Center Redevelopment (Seattle).

Achievements

The Local Capital Projects Program has helped construct a wide range of capital projects throughout the state, including county jails, museums, medical facilities, social service facilities, and educational institutions. In addition to improving the quality of life in our local communities, each capital project funded under this program stimulates the state and local economies by providing construction-related employment and revenues.
